As the winter chill arrives, one thing this writer enjoys is the warmth of the fireplace. A fireplace can make you cozy and adds a sense of peace to the cold outside. Plus, fireplaces are the holiday gateway: Saint Nick's front door.

Here are some local communities that allow buyers to enjoy their own fireplace during the winter.

Condominiums at Trump International Hotel & Tower include "imported finishes, spa-inspired baths and, of course, the fireplace in the master bedroom," said Leah Harriett, director of sales. "These homes are more than simply a residence, they are a relaxing retreat. And what could be more relaxing than lying in bed, enjoying the night lights of the city through floor-to-ceiling windows by the glow of a fireplace." Trump features homes priced from \$580,000 to \$9 million. For condominium sales information, visit www.trumpchicago.com or call (312) 644-0900.
